

any colour can be used in this area      only approved Pantone colours or white can be used in this area

Length = 225mm     Height = 114mm

This example shows the clear zones for a Medium sized window mail piece. If you are printing the delivery address **directly onto the envelope** only one 8mm clear zone is required around the delivery address itself.

\* For DLE, Max POP, E8 there may be insufficient space for an 8mm clear zone below the window. In these cases the 8mm clear zone can overlap with the 15mm sortcode clear zone.
