

# PRINTING WITH WHITE TONER

## Setting up your files for white toner

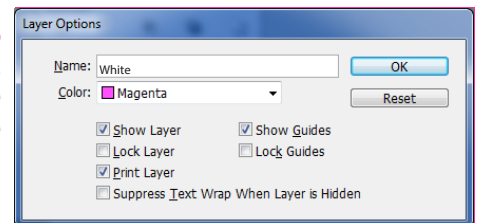

Using white toner can give your documents a unique look that makes you stand out from the rest.

### Setting up your document for printing with white toner

**A**

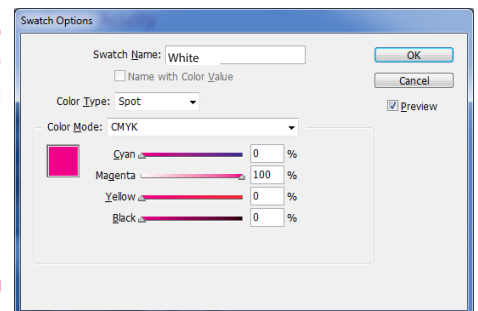

In InDesign or Illustrator, add a new layer in the layers palette. Name the new layer **White**.

**B**

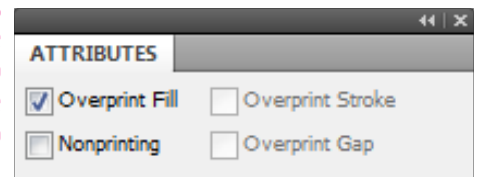

Add a new colour in the swatches palette and name it **White**.

- Designate the **Colour Type** as **Spot**.
- Set the Colour Mode to **CMYK: 0/100/0/0**

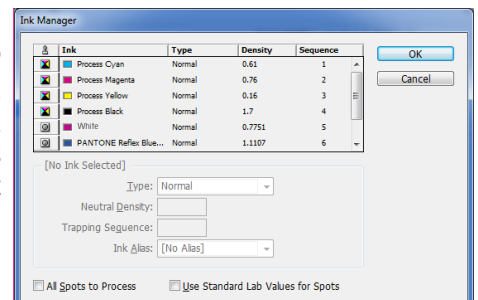

**C**

Have any objects you are printing in White set to overprint fill if you are wanting the white to go over a particular section.

**D**

When exporting your pdf, make sure the tick box "All Spots to Process" remains unchecked in the ink manager panel.
