

PRINTING WITH GOLD TONER

Setting up your document for printing with gold toner

Setting up your files for GOLD toner

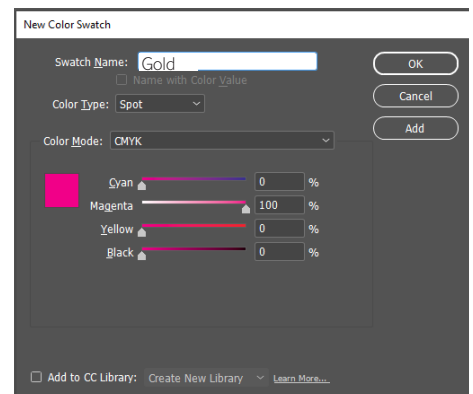

Using gold toner can give your documents a unique look that makes you stand out from the rest.

A In InDesign or Illustrator, add a new layer in the layers palette. Name the new layer **Gold**.

B Add a new colour in the swatches palette and name it **Gold**.

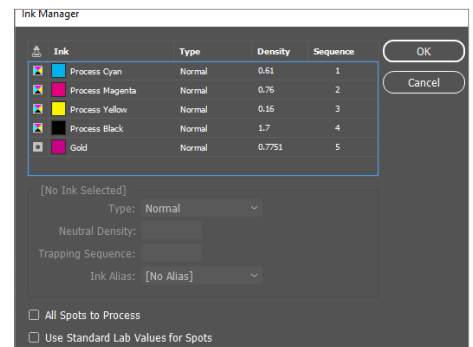

- a. Designate the **Colour Type** as **Spot**.
- b. Set the Colour Mode to **CMYK: 0/0/100/0**

C Have any objects you are printing in Gold set to overprint fill if you are wanting the white to go over a particular section.

D When exporting your pdf, make sure the tick box "All Spots to Process" remains unchecked in the ink manager panel.
